Technical Information Bulletin

Tramfloc® 1151

Tramfloc® 1151 is formulated for use in fermentation and yeast propagation. It is a 100% active product and should be used as received without dilution.

Tramfloc® 1151 is made from ingredients which are approved for use in foods as specified by the Code of Federal Regulations: Title 21, Section 173.340 and in animal feed in Sections 573 and 584. Tramfloc® 1151 is Kosher Pareve and Halal certified.

Tramfloc® 1151 should be fed directly to the fermenters and or yeast propagation tank. The optimum use level must be determined experimentally and will vary with the severity of the foaming problem. The suggested started rate is 75 PPM of the feed. The feed rate can then be optimized based on the fermenter conditions. This formulation settles upon quiescence, therefore, the product should be mixed to avoid separation.

Typical Properties

Appearance at 25° C	Opaque Pale Amber Liquid
Specific Gravity at 25° C	0.90
Density (Lbs./U.S. Gallons)	7.5
Solubility in Water	Dispersible

Packaging

Tramfloc® 1151 is available in 55-gallon drums, 330 gallon totes and in bulk quantities; FOB shipping point. Minimum shipments are either 1 tote bin or 8 drums of this formulation.
