## Technical Information Bulletin

### TRAMFLOC® 1153 FOAM CONTROL AGENT

#### *Product Description*

Tramfloc® 1153 is a food-grade defoamer designed to control foam in various food processes. Tramfloc® 1153 was specifically designed to be used in food systems that are certified as organic. This product is useful in controlling foam in these systems at relatively low rates.

#### *Properties*

Tramfloc® 1153 has an appearance of opaque amber liquid. The product has a density of 7.70 lbs. per gallon, a maximum viscosity of 3500 cps, and a flash point of >400° F.

#### *Uses*

Tramfloc® 1153 is used for the following applications: Organically certified food, potato processing, starch recovery, sugar processing, and vegetable processing. Tramfloc® 1153 is OMRI certified.

In the production of foods a starting dose of 30 to 120 ppm is recommended. The dosage should be adjusted to achieve desired level of foam control. It is recommended that the maximum use level in processed foods should not exceed that which is deemed necessary to control foam in the process.

Tramfloc® 1153 should be added as received via metering system early in the foaming process to prevent foam formulation.

#### *Safety and Health*

Wash exposed areas with soap and water. Flush eyes with water for a minimum of 15 minutes. If irritation or nausea persists, seek medical attention. If inhalation occurs, move victim to fresh air. If unconscious, administer artificial respiration and seek medical attention.
