TRAMFLOC® 1156 FOAM CONTROL AGENT

Product Description

Tramfloc® 1156 is a defoamer designed to control foam in various industrial processes. Tramfloc® 1156 was specifically designed to be used in industrial systems which require a powdered surfactant blend to control foaming conditions. This formulation mixes readily with other dried mixtures and in parts significant wetting properties to the final formulation. This product is useful in controlling foam in these systems at relatively low rates.

Properties

Tramfloc® 1156 is a white powder. It is dispersable in water and has a density of about 0.75 g/cc.

Uses

Tramfloc® 1156 is used for the following applications: imparting wetting agent properties, dry detergent formulations, various industrial applications in which any motion or liquid defoamer is contraindicated. The formulation is packaged in 250 pound net weight, open-head steel drums.

Safety and Health

Wash exposed areas with soap and water. Flush eyes with water for a minimum of 15 minutes. If irritation or nausea persists, seek medical attention. If inhalation occurs, move victim to fresh air. If unconscious, administer artificial respiration and seek medical attention.
