Technical Information Bulletin

TRAMFLOC® 2218 FOAM CONTROL AGENT

Product Description

Tramfloc®2218 is a mineral oil based defoamer designed to control foam in various industrial processes especially inks, coatings and adhesives. Tramfloc®2218 was specifically designed to be used in coating systems which experience foam formation due to the presence of chemical substrate components. The product is applied successfully at relatively low rates.

Properties

Tramfloc®2218 has an appearance of an opaque tan liquid. It is dispersible in water and has a density of 7.60 lbs per gallon.

Uses

Tramfloc®2218 is used for the following applications: ink, coating, adhesives and other applications. Stirring is recommended prior to use of this product. A starting dose of 60 to 200 ppm is recommended, up to 0.1%. The dosage should be adjusted to achieve the desired level of foam control. It is recommended that the maximum use level of Tramfloc®2218 in most applications should not exceed that which is deemed necessary to control foam in the process. Tramfloc®2218 should be added as received via metering system early in the foaming process to prevent foam formulation.

Safety and Health

Wash exposed areas with soap and water. Flush eyes with water for a minimum of 15 minutes. If irritation or nausea persists, seek medical attention. If inhalation occurs, move victim to fresh air. If unconscious, administer artificial respiration and seek medical attention.
